12.4 oz. powder or
13 oz. concentrate

Breastfeeding and Formula Feeding

WIC is here to help you meet your breastfeeding goals. Starting or increasing formula can decrease your breastmilk supply. If you need help maintaining your supply, please talk to someone at your local WIC clinic or call the free 24/7 Texas Lactation Support Hotline at 855-550-6667.

Information about Formula and WIC

- Most infants do well on milk or soy-based infant formula.
- Whether you need to temporarily supplement or prefer to use formula, WIC staff can help you choose the WIC-approved formula that is right for your baby.
- Monthly formula amounts will change as your baby gets older.
- Your baby may need more formula than your WIC package provides.
- WIC may provide you a different formula for medical reasons. You will need a prescription from your doctor and approval from WIC.
